# Greg Mrowczynski

Web Developer

Creative, detail-oriented Frontend Web Developer, with proven team work and problem solving experience, gained in various roles and environments, during over 15 years of professional career, mainly in manufacturing and engineering. Since end of 2021 I've been learning, practicing and working as freelance Web Developer. Hard skills include JavaScript, React, Typescript, Nodejs, testing and debugging. Thanks to soft skills developed during my education and professional career, I can easily adapt to new environments and different programming languages. I enjoy picking up new skills in the pursuit of self-improvement.

## Work History

**2022-02 - Current**

### Frontend Developer

*Freelance , Nuneaton*

I've been Individually learning and practicing coding and web development. I have worked on web design projects for few individuals, with use of frontend technologies: JavaScript, React, CSS. In them projects I communicated with clients during development process, to confirm creative proposals, and design best practices. I also rebuilt one client's site, initially written in HTML/CSS, using React.
Sample of my projects (available on my personal page gregmdev.co.uk):

- Movie tickets booking page (with use of local storage)
- Exchange Rate Calculator (Rest API)
- Slot machine (Object Oriented Programming)

**2022-04 - 2022-12**

### Quality Engineer

*LEVC, Coventry*

- Participated in multi-disciplinary defect reviews to discern and address root causes.
- Supported quality team members during corrective action updates.
- Facilitated process improvements to successfully
